
**Common Misbehavior against DNS Queries
for IPv6 Addresses
<draft-ietf-dnsop-misbehavior-against-aaaa-
02.txt>**

MORISHITA Orange Yasuhiro
JINMEI, Tatuya

Document status

- Rev 01 (Apr 2004) passed a wg last call
- Rev 02 (Oct 2004) in response to IESG comments
 - Used the standard keywords for describing RCODEs
 - Provided more specific references for RFC1034
 - Described an additional known issue regarding "Server failure"
- Should be ready for publication

A related activity

- "IPv6Fix" by the WIDE project
 - short-term activity to fix barriers to IPv6 deployment
 - "AAAA misbehavior" is one major target
 - documentation
 - this draft
 - collect specific incidents (ongoing)
 - identify problematic zones and implementations
 - negotiating with operators/vendors (a future plan)
 - based on the collected incidents
